24 March 1978

Dear Harold:

Ref.: yours 13 March 1979

The NAA material which I received consisted of fifty-seven pages and not seventy-three. This material dealt with test upon the CE;399, and fragments taken from JFK, JBC and the car. I am certain that I made copies of this material available to both you and Jim L.

I do have several pages relating to the curb if I recall but there seem to be nothing of specific interest there as far as shedding new light. This material I also send to the both of you.

I don't know as I shall follow this up any further. What I do have proves that the fragment from JBC's wrist and the two from JFK's head were not derived from the same type of ammunition. I do however understand that Guinn, when at the hearings, denied this and in doing so, denies the validity of his own research results. I suppose he is now changing scientific law back into theory.

I am in the dark on Kurts.

Additional slides are enclosed. Good luck in court.

Sincerely,

Emory

mine. Please return when finished
